Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

		Application No.	Applicant(s)		
Office Action Summary		10/520,272	YAMADA ET AL.		
		Examiner	Art Unit		
		Shamim Ahmed	1765		
Period fo	The MAILING DATE of this communication app r Reply	pears on the cover sheet with the c	orrespondence address		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
 Responsive to communication(s) filed on 12 March 2007. This action is FINAL. 2b) This action is non-final. Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 1765

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1,2,4,6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 4. Claim 1 recites the limitation "fluorine-contacting" in line 9. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 1765

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1,2,4,6-7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sato et al (6,270,948) in view of Kwean et al (6,897,153 B2).

Sato et al disclose a plasma etching process including the step of etching a substrate through a photoresist pattern, wherein the photoresist film (col.72, lines 6-18) is irradiated with a radiation having a wavelength of 195nm to form a resist pattern of about 180 nm width (col.72, lines 22-30 and lines 41-49).

Sato et al disclose that the substrate is etched with fluorine-containing plasma gas (col.73, lines 4-8).

Sato et al fail to teach the fluorine-containing compound having 4 to 6 carbon atoms and at least one unsaturated bond as an etching gas.

However, Kwean et al disclose a plasma etching process, particularly useful for selectively etching oxide over non-oxide material using fluorine containing gas such as including double bond or triple bond-containing carbon fluoride gases such as hexafluorobutadine (C4F6), perfluoro pentyne gas (C5F8) having at least one unsaturated bond for enhancing the etch selectivity with excellent profile control (col.4, lines 18-22 and col.5, lines 48-60).

Art Unit: 1765

Therefore, it would have been obvious to one of ordinary skilled in the art at the time of claimed invention to modify Sato et al's etching gas with Kwean et al's teaching for enhancing the etch selectivity with excellent etched profile control as suggested by Kwean et al.

4. Claims 5 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sato et al (6,270,948) in view of Kwean et al (6,897,153 B2) as applied above, and further in view of Middleton (4,621,126).

Modified Sato et al discusses above in the paragraph 3 but fail to teach the fluorocarbon containing gas comprises at least 1,1,1,3,4,4,5,5,5-nonofluoro-2-pentene.

However, Middleton illustrates the use of similar compound used as catalyst in the industries such as 1,1,1,3,4,4,5,5,5-nonofluoro-2-pentene (col.6, example 3).

Therefore, it would have been obvious to one of ordinary skilled in the art at the time of claimed invention to choose the claimed fluorocarbon containing gas, which are known to be the similar group as suggested by Middleton.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/520,272

Art Unit: 1765

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shamim Ahmed whose telephone number is (571) 272-1457. The examiner can normally be reached on M-Thu (7:00-5:30) Every Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine G. Norton can be reached on (571) 272-1465. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
